

We Called It Love

Stars

Torquil: I don't suppose you remember me
I was the one who set you free
You lived a lie until I was gone
Pretending I was the only one Keep chipping up on the things I say
It never worked but we lived it anyway
Cradle to grave, I'll be trailing you
I dreamt I broke your heart and my dream came true Amy: Wide Echo Park in 2002
You made it to the end, I was there with you
Torquil: Put down that blade there and look at me
I see my reflection, what do you see? Both: You start the day totally alone
Baring your soul to the dial tone Torquil: A golden chain that we buy and sell
Both: I've always been alone, but you have as well We used to call it something
We used to call it something
We called it love
We called it love
We called it love
We called it love Torquil: I don't believe people ever change
I don't believe people ever change
I don't believe people ever change
But I've changed
Both: I don't believe people ever change
I don't believe people ever change
I don't believe people ever change
But I've changed Torquil: Oh, I've changed
