

# Escape 2 Mars

## The Gift of Gab

Escape to mars  
It ain't that farâ?l  
Escape to mars  
It ain't that farâ?l Verbal-verbal-verbal-verbal-verbal-verbal-verbal-verbal  
Verbally strike like  
Lightning  
Phenomenal  
Abominable rhymer rally  
Timin' always automatic  
Python clouds surrounded to  
Gather all the planet  
Night comes down  
And all about there's a lot of panic  
Gratification  
Quick fix  
Mind manic  
In the wagon  
Antagonizing the wind  
All matter  
It is the earth who'll stand through  
The aftermath  
That'll bring forth many avalanche storms  
In the canyons  
Once filled with snow  
Whether only the tarantulas and insects survive  
Replacin all humanity  
We crammin all the damage in the ozone habitat  
And travellin into a savage end  
I hope the tabernacle songs  
Bring upon the awakening of the nap  
And gunna be a long long summer (?) after that  
Man wonton soup  
Plant life cabbage  
That is guided by the powers  
Of the dyin and the flowers c'mon  
Escape to mars  
It aint that farâ?l.  
Escape to mars  
It aint that farâ?l A 4 C rise in temperature would put many of  
you at risk of coastal flooding,  
causing 30-50% reduction in water availability,  
in southern Africa and the Mediterranean.

Agricultural yields will decline.  
 20-50% of animal and plant species would face extinction.  
 Party over!  
 Oops  
 Out of sight  
 Time, mind  
 Illuminati death trap  
 Blind deaf and dumb  
 Crazy bent  
 80 percent  
 Wiped out sniped out  
 Burn baby burn get hit  
 When we could've been turnin the cell phones off  
 Ripped through your city the Bentleys that sell most (?)  
 Fish, than the fishes you catch  
 They smell so toxic from the rivers ingestin their flow now  
 (Wait?) til humidity's  
 Summer's are left cold ya'll  
 Kids gunna feel it  
 There's no effect on ya'll  
 Since you directly don't experience no  
 Cause and effect  
 Drift inflicting the ozone wall  
 Gradually  
 It's all at a hands happening  
 Global warming on the rise  
 Sad to see  
 If we don't make a change now  
 Then the path that we choose  
 Is our own til we save our planet  
 Renovate all traffic  
 Innovate more atmospheric  
 Brace all damage  
 Done away with  
 Maybe some escape to another planet  
 Face mutated  
 In a spaceship  
 Travelling in spaces  
 Examining the ways of man  
 And how we take advantage of  
 The place we inhabit it  
 And taste more lavish shit  
 Racism hatred we did got past it  
 But we may all be prey to the wrath of Mother Nature  
 Escape to Marsâ? It ain't that far  
 Escape to Mars
