

Down (feat. Jfdr)

Sin Fang

Wake me up, please
When my silly dreams fall into me
I go into tall mountain trees
Falling past the ceiling spires
I've always knew
And parking lots Now you've got me feeling down
Misery and sorrow follow us around I feel the love of those that are not physically around me
I can muster up a little more hope and courage from
And it's beautiful out here in space
I float on my back, and the stars in my face
I explode into the blue black
If I float down will you take me back I feel the love of those that are not physically around me
I can muster up a little more hope and courage from
I feel the love of those that are not physically around me
I can muster up a little more hope and courage from
(deep in deep in)
I feel the love of those that are not physically around me
I can muster up a little more hope and courage from
I feel the love of those that are not physically around me
I can muster up a little more hope and courage from Deep inside (deep in deep in)
