

Space Police (Progressive Version)

Edguy

An ocean of stars gleaming like diamonds
How many times have we wondered what lies behind
And how do you wish to make explorations
And travel through space and time
To the crest of forever Shoot up to life out there what will it be like?
And if we're much faster than light maybe I can see
What the shine of my ego looks like from a distance
And what do they know about me in faraway solar systems? Oh I dive in zero gravity
A glance at the All We're riding out, pass by the moon
Bird's eye view on the universe
We're all about breaking the rules
"Freeze!" goes the space police
"You're all about to make a fool of yourself"
Goes the space police
Cause you're about to negate their rules
They're the space police Your visions caught speeding
By free spirits that you recognize by the look
Spacetrotting dissident freedom police
Contrarians by the book
Freedom and wisdom they guard from outside
Stars and infinity shaking their heads at the force
Into the black hole Oh what looked like zero gravity
Is just a gelatinous mass We're riding out, pass by the moon
Bird's eye view on the universe
We're all about breaking the rules
"Freeze!" goes the space police
"You're all about to make a fool of yourself"
Goes the space police
Cause you're about to negate their rules
Watch out for the space police Space police
Get me back on the straight and narrow
Space police
Law and order at the border to infinity
Space Police Aaaaaah
Aaaaaah
Ahhaaahaaahaaaa Aaaaahaaahaaahaaahhaaa
Aaaahaaaa hahahaha aaaah aaaahaaaaaaa
Aaaahaaahaaa aahaaaaaaa We're riding out, pass by the moon
Bird's eye view on the universe
We're all about breaking the rules
"Freeze!" goes the space police "You're all about to make a fool of yourself"
Goes the space police

Cause you're about to negate their rules
Watch out for the space police We're riding out, pass by the moon
Bird's eye view on the universe
We're all about breaking the rules
"FREEZE!!! - SPACE POLICE!!!"
