

# Let It Go

## Cavo

Wait it out till the light  
Take a breathe, say good night  
But don't ever go away  
Wait around to find the time  
Only you can take what's mine But don't ever go away  
I'll be waiting', I need to let it go  
Fade it out into the light  
All these years we never get it right  
I need to let it go  
No more reasons to deny  
That I believed that you were mine  
I need to let it go  
A chance to change or stay the same One night with out the blame  
That don't ever go away  
Only you can make it right  
To walk away with out a fight  
But don't ever go away  
I'll be waiting, I need to let it go  
Fade it out into the light  
All these years we never get it right  
I need to let it go  
No more reasons to deny  
That I believed that you were mine  
I need to let it go  
I wish you'd let me go
