

# Continuum

## Lemaitre

We set adrift in search of fact.  
It seems in day, life feels abstract.  
Several years that wont feint sun.  
This last debt that holds no line. Making our way through time and space.  
Exploring all three to infinity.  
Took at his back, fly all three.  
Watching the stars at night, you came over time.  
All the while sippin on some bitches tea.  
In dark of night a hope would shine  
for us to find when we arrive.  
A neon light. The rivers kind.  
Can get them out. But perhaps wont time. Making our way through time and space.  
Exploring all three to infinity.  
Took at his back, fly all three.  
Watching the stars at night  
you came over time.  
All the while.  
Making our way through time and space.  
Exploring all three to infinity.  
Took at his back, fly all three.  
Watching the stars at night, you came over time.  
All the while.  
Making our way through time and space.  
Exploring all three to infinity.  
Took at his back, fly all three.  
Watching the stars at night, you came over time.
