

# Sleep On the Left Side

## Cornershop

Sleep on the left side  
Leave the right side free  
Hope gets salted  
As those around you leave  
We're gonna let it up like India House on fire  
We're gonna let it go  
And let it go higher  
Let it go Sleep on the left side  
Houcam is our call  
We're gonna take it  
That virgin fall  
There's gonna be some  
When we let it up  
And let it breathe  
And all the holes  
Doused with grief  
And planets up  
And time to leave  
No Asian fire  
Will leave us dyre  
Born again to Asian #lion#  
There comes no telling  
How it will be  
What's turned to smoke  
Was in our hearts  
And planets up  
What we have lost  
Foot racing from kitchens  
Down alleys through gulleys  
Meeting every second hour  
Never to come to terms with?  
Foot racing to Putabin Key  
'cause there's too much going on  
To jeer on green goddesses, local dignitaries and labor counselors  
Always #in touch# by #way of# the community organ? we're about to be #orphaned# Sleep on  
the left side  
Keep the sword hand free  
Arrrh, wuttevess gonna be is  
Gone nu be  
For the 7th time  
WithOUT, tumbling disyre  
Easy dizease

We're gonna let it known  
And let it go slow, let it go  
Sleep on the left side  
Sleep on the left sideSome sounds  
Some #burdens#  
#Can# releaseSome sounds  
Some #burdens#  
#Can# releaseSome sounds  
Some #burdens#  
Sleep on the left side
