

Ice

Daniel Lanois

Yes it's cold by the river where you lay
In this godless place I kneel down and I pray
God help us through the night
God help us through the night
Your voice would fill the night
I think of yesterday I want to hold you
Your worn out hands don't touch me now
Here where it's stormy but nothing
God help us through the night
God help us through the night
Through this foolish night
In your golden arms I want to cry I want you to hold me
It'll come
Slips through the cold night
'Cause it's cold by the river where you lay
God help us through the night
God help us through the night
Through this foolish night
In your golden arms I want to cry Yes it's cold by the river where you lay
