

# One Line

PJ Harvey

Do you remember the first kiss?  
Stars shooting across the sky  
To come to such a place as this  
You never left my mind I'm watching from the wall  
As in the streets we fight  
This world all gone to war  
All I need is you tonight And I draw a line  
To your heart today  
To your heart from mine  
A line keep us safe  
All through the rising sun  
All through the circling years  
You were the only one  
Who could have brought me here And I draw a line  
To your heart today  
To your heart from mine  
One line to keep us safe And I draw a line  
To your heart today  
To your heart from mine  
And pray to keep us safe  
Watch the stars now moving  
Across the sky  
Keep this feeling  
Safe tonight
