One Line

PJ Harvey

Do you remember the first kiss? Stars shooting across the sky To come to such a place as this You never left my mindI'm watching from the wall As in the streets we fight This world all gone to war All I need is you tonightAnd I draw a line To your heart today To your heart from mine A line keep us safe All through the rising sun All through the circling years You were the only one Who could have brought me hereAnd I draw a line To your heart today To your heart from mine One line to keep us safeAnd I draw a line To your heart today To your heart from mine And pray to keep us safe Watch the stars now moving Across the sky Keep this feeling Safe tonight
