

# Crossroad (feat. Danyka Nadeau)

[Au5](#)

Say the words  
Even if it hurts  
We've been pretending nothing's wrong far too long  
Say it out loud  
Like you really mean it now  
Cause this is the last time We're at the cross road  
And I can't let it go  
I tried to make you stay  
But you're already far away  
We're at the crossroad  
And I let it go  
Now I know this much is true  
I won't be running after you  
We're at the crossroad We're at the crossroad Say the words  
Even if it hurts  
We've been pretending nothing's wrong far too long  
Say it out loud  
Like you really mean it now  
Cause this is the last time  
We're at the cross road  
And I can't let it go  
I tried to make you stay  
But you're already far away  
We're at the crossroad  
And I let it go  
Now I know this much is true  
I won't be running after you Now I know this much is true  
I won't be running after you We're at the crossroad
