

New York City (Escape Mix)

[Paul van Dyk, Starkillers & Austin Leeds](#)

I watch the sky turn black to blush
Head still spinning from the rush
Of all the things I did the night before
And looking down from my hotel
These dawn-lit streets begin to fill
With memories of you and I
On a New York City night
On a New York City night
I shake my head to clear the sounds
The traffic horns, the gowing crowd
The sun awaking over Central Park
But still it creeps beneath my skin
All of these heartbeats begin to din
With concrete dreams stirring to life
On a New York City night
Just close my eyes and I'm back again
The neon flush upon our skin
still wrapped in thoughts of love and wine
On a New York City night
