

Every Color

Louis The Child & Foster the People

I can see every color in you
And I can feel every color in me
I can see every color in you And I can feel every color in me
I can see You got me frozen like a photograph, yeah
Floating in a future modern throwback, oh
I'm alive, I'm alive, I'm alive
It's clearer than it was before
You can hide, you can hide, you can hide
But you don't see what I do I can see every color in you
And I can feel every color in me
I can see every color in you
And I can feel every color in me I can see
I can see
Caught up drifting in your rainbow eyes, yeah
On the moon watching your sunrise, oh
I'm alive, you're alive, we're alive
It's clearer than it was before
You can hide, you can hide, you can hide
I'll help you see what I do
And I can see every color in you
And I can feel every color in me
And I can see every color in you
And I can feel every color in me
I can see
I can see
I can see
And I can see every color in you
And I can feel every color in me
I can see
