

All Time Low (Todd Rundgren Remix)

Nine Inch Nails

Go

I've heard all I need to know
Your voice in fucking echo stereo

This particular scenario
Looks like another all time low Why did you go and let them in
See this is where the fun begins
You barely even pierced the skin

Just wait 'til you see what has come in Get down on the floor

Shut the god damn door

We'll do this all before

They're coming back for more

So give me just a little, baby

Just something to get by

It's gonna last forever, baby

We'll get the other side

And we will live forever, baby

And stretch across the sky

I'll follow right behind you, baby

We're never gonna die Hey

Everything is not okay

We lost too much along the way

The passengers are out today

It looks as though they're here to stay

This paranoia turns to fear

This too is whispering in your ear

Pretending but I know you hear

That's how we fucking end up here

So give me just a little, baby

Just something to get by

It's gonna last forever, baby

We'll get the other side

And we will live forever, baby

And stretch across the sky

I'll follow right behind you, baby

We're never gonna die We're never gonna die

How did we get so high Stretch across the sky

Stretch across the sky

Stretch across the sky

Stretch across the sky

Stretch across the sky

Stretch across the sky

Stretch across the sky

Stretch across the sky
