

We Could Happen

AJ Rafael

I'll hold the door
Please come in
and just sit here for a while.
This is my
way of telling you I need you in my life.
It's so cold
without your touch.
I've been dreaming way too much Can we just
turn this into reality.
Cause I've been
thinking 'bout you lately.
Maybe you could save me
from this crazy world we live in.
And I know we could happen
cause you know that I've been feeling you.
Storms they will come
but I know
that the sun will shine again.
He's my friend
and he says that we belong together. I'll sing a song
to break the ice.
Just a smile from you would suffice.
It's not me
but this is real tonight
Cause I've been
thinking 'bout you lately.
Maybe you can save me
from this crazy world we live in.
And I know we could happen
cause you know that I've been feeling you.
I know you want me
There's no other there's no other love.
That I'd rather have
you know.
There ain't no one
there ain't no one else.
I want you for myself I've been
thinking 'bout you lately.
Maybe you can save me
from this crazy world we live in.
And I know we could happen
cause you know that I've been feeling you.

I know you want me
I've been
thinking 'bout you lately.
Maybe you can save me
from this crazy world we live in.
And I know we could happen
cause you know that I've been feeling you.
I know you want me too
I know you want me too
