

# my strange addiction

Billie Eilish

Don't ask questions you don't wanna know  
Learned my lesson way too long ago  
To be talking to you, belladonna  
Shoulda taken a break, not an oxford comma  
Take what I want when I wanna  
And I want yaBad, bad news  
One of us is gonna lose  
I'm the powder, you're the fuse  
Just add some frictionYou are my strange addiction  
You are my strange addiction  
My doctors can't explain  
My symptoms or my pain  
But you are my strange addiction  
Deadly fever, please don't ever break  
Be my believer 'cause I don't self medicate  
And it burns like a gin and I like it  
Put your lips on my skin and you might ignite itBad, bad news  
One of us is gonna lose  
I'm the powder, you're the fuse  
Just add some frictionYou are my strange addiction  
You are my strange addiction  
My doctors can't explain  
My symptoms or my pain  
But you are my strange addiction  
Bite my glass, set myself on fire  
Can't you tell I'm crass?  
Can't you tell I'm wired?  
Tell me "nothing lasts"  
Like I don't know  
You could kiss my  
Asking about my mottoYou are my strange addiction  
You are my strange addiction  
My doctors can't explain  
My symptoms or my pain  
But you are my strange addiction
