

# Your Soul

## Hippie Sabotage

Just because we're not alone  
You echo words you've heard  
You let me go just to watch me discern  
Just because it feels the same, til the morning comes  
Even roads fill the sun so coldJust because we're not alone  
You echo words you've heard  
You let me go just to watch me discern  
Just because it feels the same, til the morning comes  
Even roads fill the sun so cold  
Just because we're not alone  
You echo words you've heard  
You let me go just to watch me discern  
Just because it feels the same, til the morning comes  
Even roads fill the sun so coldJust because we're not alone  
You echo words you've heard  
You let me go just to watch me discern  
Just because it feels the same, til the morning comes  
Even roads fill the sun so coldJust because we're not alone  
You echo words you've heard  
You let me go just to watch me discern  
Just because it feels the same, til the morning comes  
Even roads fill the sun so cold
