

# War

## Ahmir

Take no prisoners  
Hold the line and shoot the blame  
There's something in us can't let go  
We've changed  
Words don't come easily anymore  
And when they do  
They come out wrong  
Chorus:  
And we fight  
Like there's a war going on  
We fight like guns and daggers are drawn  
We fight all night and into the dawn  
And wonder what went wrong  
And we're at war  
And we're at war  
Bitter tasting  
Kisses from your lips  
Empty spaces between us still  
Chorus:  
And we fight  
Like there's a war going on  
We fight like guns and daggers are drawn  
We fight all night and into the dawn  
And wonder what went wrong  
And we're at war  
And we're at war  
Won't someone wave the white flag  
There's a chance we might still last  
Retreat and get back on track  
All we want is our love back  
Don't want us to be strangers  
Is still love you  
Chorus:  
And we fight  
Like there's a war going on  
We fight like guns and daggers are drawn  
We fight all night and into the dawn  
And wonder what went wrong  
And we're at war  
And we're at war  
Won't someone wave the white flag  
There's a chance we might still last  
Retreat and get back on track  
All we want is our love back  
Don't want us to be strangers

War  
Is still love you  
Something to change us War (repeat)
