

We'll Be the Stars

Sabrina Carpenter

We are young, we are gold
Trying things we didn't know
Looking at the sky
See it come alive All our fears became our hopes
Climbed out every locked window
We rode a lion's mane
And fell upon the rain We can reach the constellations
Trust me, all our dreams are breaking out
No, we're never gonna turn to dust
Yeah, all we really need is us
Don't be scared to close your eyes
No, we're never gonna die
We'll be the stars
Oh, no we're never gonna step too far
Yeah, we're holding on to who we are
When it's time to close our eyes
They will see us in the sky
We'll be the stars
We'll be the stars
We'll be the stars Let me in, hold me close
Fill my heart with simple notes
So when it's hard to see
They are there reminding me
Take my breath and hold me high
So I can feel the city lights glowing under me
It's in our reach, we're breaking out
No, we're never gonna turn to dust
Yeah, all we really need is us
Don't be scared to close your eyes
No, we're never gonna die
We'll be the stars
Oh, no we're never gonna step too far
Yeah, we're holding on to who we are
When it's time to close our eyes
They will see us in the sky
We'll be the stars
We'll be the stars
We'll be the stars We can reach the constellations
Trust me, all our dreams are breaking out No, we're never gonna turn to dust
All we really need is us
We'll be the stars
Oh, no we're never gonna step too far

Yeah, we're holding on to who we are
When it's time to close our eyes
They will see us in the sky
We'll be the stars
We'll be the stars
We'll be the stars
We'll be the stars
No, we'll be the stars
