

Fury of the Storm

DragonForce

Woh woh wohhhhhhhh We are riding for the battlefield in force tonight
Fury of the darkest evil cry for war
Far beyond the boundaries of hell and starlight
On the road to lands unknown forever more Through the caverns far below our quest will lead us
Onwards through the ice and snow forever more
Standing fighting full of hate the time has come now
Stand and sound the guns of glory cry for war On wings of glory we will carry on
Far across forgotten lands towards the distant sun
And in the darkness shining far beyond the starlight
Lightning is striking from the dark dawning shadows
And in the kingdom of the everlasting sun
When the glory of the master's time has come!
Into the fires of forever we will fly through the heavens
With the power of the universe we stand strong together
Through the force in our power, it will soon reach the hour
For victory we ride, Fury of the Storm! Here we are the chosen ones we can not fail now
Spilling all the blood on the fires below
Smashing through the boundaries with the fire and fury
Killing all the mortals down the winding road Hellfires are raging the storm growing strong
On the path to victory towards the distant sun
And in the darkness shining far beyond the starlight
Lightning is striking from the dark dawning shadows
And in the kingdom of the everlasting sun
When the glory of the master's time has come!
Into the fires of forever we will fly through the heavens
With the power of the universe we stand strong together
Through the force in our power, it will soon reach the hour
For victory we ride, Fury of the Storm!
Into the fires of forever we will fly through the heavens
With the power of the universe we stand strong together
Into the fires of forever we will fly through the heavens
With the power of the universe we stand strong together
Through the force in our power, it will soon reach the hour
For victory we ride, Fury of the Storm!
For victory we ride, Fury of the Storm!
