slow motion

Flor

Easy to see it wasted Deep in the summer time When the world's on fireI feel and taste it Sticks to the roof of my mouth Lasts through the nightIt's coming in a little bit hot, see Loving what I feel but it gets to me And I know it's all in my head And it still makes the world feel a little like it ain't real I swear you move slow motion Watching you looks like bending time Catch me in your illusion Helping me lose my mindDouse it in the water Cool when you feel it Hot but it's turning down It hurts to leave it But it's much too much to handle nowIt's coming in a little bit hot, see Loving what I feel but it gets to me And I know it's all in my head And it still makes the world feel a little like it ain't realI swear you move slow motion Watching you looks like bending time Catch me in your illusion Helping me lose my mind I swear you move slow motion Watching you looks like bending time
