

# Problems (feat. Lido)

## Petit Biscuit

The amount of magnetism is perfect  
She says she knows just how to cool down California, for me  
Text at 3 AM because her roommate is back in Texas  
I copy like: "Roger"  
We could climb some trees and get perspective  
Mirror right next to her bed  
Motion perfected, all I can do is respect it  
Why'd you wanna be around me in the first place?  
She said: Baby I've been down since third grade  
you were satisfied with first base  
And I've been widely known to be providing earthquakes  
You must not have heard  
She likes the shark print with the zip-up  
High hats with the hiccups  
Dark tints on the pickup  
Pineapples and liquor  
She moves with the machine  
Play the game to change it  
This is how it is to be  
This is what I'm made with  
This is love  
Love love love love  
This is what I'm made with  
This is love  
Love love  
I watch the silhouette against the sunrise  
She read my mind and poured some earl grey in a solo, for me  
Asked me if I wanna go to Mars and watch the world end  
I think I might love her  
And she got everything I need  
Playing Jodeci at noon  
We might never leave her room  
She likes the shark print with the zip-up  
High hats with the hiccups  
Dark tints on the pickup  
Pineapples and liquor  
She moves with the machine  
Play the game to change it  
This is how it is to be  
This is what I'm made with  
This is love  
Love love love love  
This is what I'm made with

This is love  
Love love  
This is what I'm made with  
This is Love love love love  
This is what I'm made with  
This is  
Love love
