

# History Defeats

## No Use for a Name

The bombs are falling through the sky  
The king has spoken  
All units move out to the east To find a war that wasn't meant  
One by one they fall  
To a false enemy No evidence to meet demands  
The will is broken  
Revenge is sweet without a crime  
Keep them confused  
Make them afraid  
Fear is what we breed  
So fuck conspiracy  
Nobody is free Welcome to the show you're about to learn another lesson  
A shame to be American  
Like a movie, a twisted plot come with no ending  
Sympathy's not in the plan Don't tell them they don't have the cards,  
Bond job with purpose  
Just give the message  
What they want to see Defeats stop insecurity  
One must have a plate  
And an appetite for blood  
To be part of the feast  
Step right up and see the liar give his best performance  
In this theater called hell  
We'll not be fooled, believe in anything they tell us  
To benefit a commonwealth  
History defeats itself
