

Been There Before

Ghost Beach

All of the pieces came apart in your mind so you layer them all out.
Keep conversations away from your mouth cause they're selling you out.
You turn around and see your face in the sun, you remember it now.
You'd give it up just to find a way out but you're changing I put my hand on your heartbeat, like
I've been there before
It doesn't matter what my sense says
Cause I've been there before These are the days of evolution and sounds and its wearing you out.
Lost in a vision of where you are now it keeps letting you down.
But out in the ocean. all the explosions.
You'd give it up just to find a way out but you're changing you keep changing
and I put my hand on your heartbeat, like I've been there before
It doesn't matter what my sense says
Cause I've been there before
