

We Got to Have Peace (Eddie Baez Laid Back Mix)

Curtis Mayfield

We got have peace
To keep the world alive
And war to cease. We got to have joy,
True in our hearts
With strength we can't destroy. People please hear us (people please hear us)
Through our voice the world knows
There's no choice. We're begging save the children
The little ones
Who just don't understand Give them a chance
To breed their young
And help purify the land
People please hear us (people please hear us)
Through our voice the world knows
There's no choice. And the people in the neighbourhood,
Who would if they only could,
Meet and shake the other's hand,
Work together for the good of the land. Give us all an equal chance,
It could be such a sweet romance.
And the soldiers who are dead and gone,
If only we could bring back one, He'd say "We've got to have peace"
To keep the world alive
And war to cease We got to have joy
True in our hearts
With strength we can't destroy
People please hear us (people please hear us)
Through our voice the world knows
There's no choice And the people in the neighbourhood
Who would if they only could
Meet and shake the other's hand
Work together for the good of the land Give us all an equal chance
It could be such a sweet romance
And the soldiers who are dead and gone
If only we could bring back one He'd say "We've got to have peace"
Aah - hah, we got to have peace. Let Let the world know it Peace, peace, peace
Aah - hah, we got to have peace People please hear us (people please hear us)
Through our voice the world knows
There's no choice Save the children Save the children Save the children And the people in the
neighbourhood
Who would if they only could
Meet and shake the other's hand

Work together for the good of the land Give us all an equal chance
It could be such a sweet romance
And the soldiers who are dead and gone
If only we could bring back one He'd say "We've got to have peace"
Lo - rd, we got to have peace Let the people say it Peace peace peace
Aah - hah, we got to have peace
