

Golden Dawn

Barbra Streisand

One golden dawn
One summer night
With nothing left to say We left the dream begin
It was carried on the wind
And it wandered away One golden sky
One spark of light
Forever will remain And the song of the storm
Brought us close
Kept us warm
All alone making love
In the rain
Gone is the world outside
Home on the turning tide
True love will find the sun
And know the reason why You make me hunger for
You whispered mi amor
Over the ocean's roar
And the night will become
Our golden dawn Two hearts as one
No tears to cry
With you I have it all If love can never die
I'm not afraid to fly
But how far must I fall
One silver song
One lullaby
For all the love we make It's the look in your eyes
It's the sound of the heart
That you break Gone is the dark of night
Call on the early glow
Send down the birds of love
That circle us below And still I will hunger for
You whispering mi amor
Over the ocean's roar
And your arms reach for me
And the shine on the sea
And the night will become
Our golden dawn
