## **Golden Dawn**

## **Barbra Streisand**

One golden dawn One summer night With nothing left to sayWe left the dream begin It was carried on the wind And it wandered awayOne golden sky One spark of light Ferever will remainAnd the song of the storm Brought us close Kept us warm All alone making love In the rain Gone is the world outside Home on the turning tide True love will find the sun And know the reason whyYou make me hunger for You whispered mi amor Over the ocean's roar And the night will become Our golden dawnTwo hearts as one No tears to cry With you I have it allIf love can never die I'm not afraid to fly But how far must I fall One silver song One lullaby For all the love we makeIt's the look in your eyes It's the sound of the heart That you breakGone is the dark of night Call on the early glow Send down the birds of love That circle us belowAnd still I will hunger for You whispering mi amor Over the ocean's roar And your arms reach for me And the shine on the sea And the night will become Our golden dawn Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
