

# Algorhythm

## Childish Gambino

Supercomputer status, walkin' along streets  
Everyone is an addict, stumbling concrete  
What was the motivation? Constant communication  
Everybody wanna get chose like Moses  
Came out mother earth smelling like roses  
Summon the new edition, made it way too efficient  
Made us the guinea pig and did it with no permission  
Told her to call a friend, didn't tell her to listen  
So very scary, so binary, zero or one  
Like code is like coal mine canary  
I dream in color, not black and white  
You sell your daughter on that data stream  
Go finally make a hit now  
Humans don't understand, humans will sell a lie  
Humans gotta survive, we know we gon' die  
Nothing can live forever, you know we gon' try  
Life, is it really worth it? The algorithim is perfect, mmh  
Everybody (Everybody), move your body, now do it (Now do it)  
Here is something (Ooh), that's gonna make you move and groove  
(Please don't lose that tempo)  
Algorhythm  
(Moving how they say so)  
Algorhythm Step, step, slide, slide  
Move your body from side to side  
Clap your hands, don't spite the vibe  
Keep on moving, you might survive  
Pressure is to evolve, take a bite of the apple (Ooh)  
We crush it into the sauce, how do we know the cost?  
How do we know the truth without feeling what could be false? (Ooh)  
Freedom of being wrong, freedom of being lost  
Wait a minute, wait a minute (Wait a minute, wait a minute)  
Feelin' like the devil did it (Devil did it, ooh)  
Lord willing, I'ma step to it (Step to it)  
You gon' fall behind if you can't do it (Ooh, yeah)  
Ooh, we eating good over here now (Yeah)  
Is you eating good over there now? (No)  
Dreaming ain't the move, do I care now? (No)  
Looking for something worth it, the algorhythm is perfect, mmh  
Everybody (Everybody), move your body, now do it (Now do it)  
Here is something (Ooh), that's gonna make you move and groove  
(Please don't lose that tempo)  
Algorhythm  
(Moving how they say so)

Algorhythm (Woo)  
Everybody (Everybody), move your body, now do it (Now do it)  
Here is something (Ooh), that's gonna make you move and groove  
Algorhythm (Woo)  
Algorhythm (Yeah, yeah)
