

# Fire Burns Bright

## Binocular

As we've heard before today  
The land is ripe in times of change  
So why can't we look at things the way we used to do  
'cause they're never gonna be the same And I can't lose  
You should have known  
So tell me why should I tell myself that things are going on  
If we're never gonna make that change I don't wanna go back home  
And leave you hopeless in the night  
But I fear the worst and then I just fear what we'll lose  
So let's dance into the moonlit night  
'til the fire burns bright  
I know you hear the things I say  
Though secrets kept me far away  
So let's discover what we can while we're here  
If we're ever gonna turn that page And I can say  
But you've always known  
So tell me why should I shelter and protect you in the storm  
When the sun still shines as yesterday I don't wanna go back home  
And leave you waiting in the night  
But I fear the next step that we take we'll go too far  
So let's hold on while we've got tonight  
And the fire burns bright  
'til the fire burns bright  
But I fear the worst and then I just fear what we'll lose  
So let's dance into the moonlit night  
'til the fire burns bright ('til it burns)  
'til the fire burns bright
