## Fire Burns Bright

## **Binocular**

As we've heard before today The land is ripe in times of change So why can't we look at things the way we used to do 'cause they're never gonna be the sameAnd I can't lose You should have known So tell me why should I tell myself that things are going on If we're never gonna make that changeI don't wanna go back home And leave you hopeless in the night But I fear the worst and then I just fear what we'll lose So lets dance into the moonlit night 'til the fire burns bright I know you hear the things I say Though secrets kept me far away So let's discover what we can while were here If we're ever gonna turn that pageAnd I can say But you've always known So tell me why should I shelter and protect you in the storm When the sun still shines as yesterdayI don't wanna go back home And leave you waiting in the night But I fear the next step that we take we'll go too far So let's hold on while we've got tonight And the fire burns bright 'til the fire burns bright But I fear the worst and then I just fear what we'll lose So let's dance into the moonlit night 'til the fire burns bright('til it burns) 'til the fire burns bright Song Discussions is protected by U.S. Patent 9401941.
