

A Gentlemen's Coup

Rise Against

The pain
disorder
a cataclysmic dawn
we trustedbut something has gone wrong
we bought in
but woke to find it gone
impact in 5-4-3-2....Brace
for fallout
the radiation creeps
on cats feetwe scatter in the streets
she asked me
"do you think its safe to breathe?"
it doesn't look that way to me
We stormed the gates
and raised new flags
but it's just the same old story
we seized the throne
subjugatewe should have burned it to the ground
some might say we've lost our way
but I believe we've not gone far enough
Afraidwe cower
to interests not our own
the power
to free or to controlwe let it slip through
our fingers to the floor
watch as the bodies wash ashore
nobody lives here anymore
We stormed the gates
and raised new flags
but it's just the same old story
we seized the thronesubjugate
we should have burned it to the ground
some might say we've lost our way
but I believe we've not gone far enoughHow long will we fall for this?
How long will we fall for this?
How long will we fall for this?
How long will we fall...?
How long will we fall for this?
How long will we fall for this?
How long will we fall for this?
How long...? How long...?
We stormed the gates

and raised new flags
but it's just the same old story
we seized the throne
subjugate
we should have burned it to the ground
some might say we've lost our way
but I believe we've not gone far enough
