

Everlast

James Ingram

this is forever
now we won't ever
look for forever again
hands from the holding
slowly unfolding
this is wherever begins
through many moments
just wait, just wait
this is a seconds with time
must to stay
we see the future
in the rising of east
everlast, everlast
inside this blessing
we found confessing
draw with through free soul
this no said
now wish in so right
we're inside of young in soul
through many moments
just wait, just wait
this is a seconds with time
must to stay
we see the future
in the rising of east
everlast, everlast
