

# Mystery Machine

## Angra

Mystery Machine  
The sun rises over the tide  
Waves breaking over the rocks  
Again and again like an echo  
From the mountain tops  
This feeling you just can't hide  
Like an open page revealed for all to see  
You breathe hard,  
Like the sea breeze coming in  
Hold your arms to the sky  
Don't let clouds hide the sun  
Don't runaway cos' you can't hide from thunder  
Cold sweat glistening on your brow  
The rains will come crashing down  
A million voices sing out loud again tonight  
As the mysteries of life begin to unfold  
Master of fate you're the only one who knows  
Machine of mystery roles on
