Missing U

Robyn

Baby it's so real to me now that it's over The space where you used to be Your head on my shoulder All of the plans we made that never happened Now your scent on my pillow's faded At least you left me with somethingThere's this empty space you left behind Now you're not here with me I keep digging through our waste of time But the picture's incomplete There's this empty space you left behind Now you're not here with me I keep digging through our waste of time But the picture's incomplete 'Cause I'm missing you I miss youCan't make sense of all of the pieces Of my own delusions Can't take all these memories Don't know how to use 'em There's a slick washed up onto the beach I follow the traces Finding clues in my pockets and opening boxes And going places we went Remember to forget Thinking how it could been I've turned all my sorrow into glass It don't leave no shadow There's this empty space you left behind Now you're not here with me I keep digging through our waste of time But the picture's incomplete There's this empty space you left behind Now you're not here with me I keep digging through our waste of time But the picture's incomplete 'Cause I'm missing you I miss you(I miss you) This part of you This clock that stopped This residue It's all I've got (I miss you) This part of you

This clock that stopped (Clock that stopped) This residue (It's all I got) It's all I've gotThere's this empty space you left behind (This part of you, this clock that stopped) I keep thinking you're still right beside me (This residue, It's all I got) You're still there There's this empty space you left behind (This part of you, this clock that stopped) All the love you gave, it still defines meThere's this empty space you left behind I keep thinking you're still right beside me There's this empty space you left behind I keep thinking you're still right beside me There's this empty space you left behind All the love you gave, it still defines me Song Discussions is protected by U.S. Patent 9401941.
