

First Night

Survivor

We will remember this first night forever
After all the songs fade away
And the stage fades to gray And we will remember this first night together
We'll recall the things that we said
All the foolish dreams in our head
On the night we met I'm searching your eyes, have I seen you somewhere
You're filling my thoughts with a strange intrigue
I rivet my glance to your every movement
I got a notion your love's in a whole different league Tell me your name
What's your persuasion
Your first impression
Of this whole occasion
And this night shall be the first night
And first nights were made for love
I can taste the action in the air tonight
Hearts are poundin' as the sparks ignite And this night shall be remembered
Long after the music's gone
And we'll reminisce on the things we said
And we'll fall in love again In the air I can sense a strong attraction
Emotions run wild are we on the verge?
We got a hot-line to satisfaction
I got the answer if you got the urge My motor is hot
I'm feeling elation
You came in the night
With the right temptation
And this night shall be the first night
And first nights were made for love
I can taste the action in the air tonight
Hearts are poundin' as the sparks ignite And this night shall be remembered
Long after the music's gone
And we'll reminisce on the things we said
And we'll fall in love again We will remember this first night forever
We'll recall the things that we said
All the foolish dreams in our head And this night shall be the first night
And first nights were made for love
I can taste the action in the air tonight
Hearts are poundin' as the sparks ignite And this night shall be remembered
Long after the music's gone
And we'll reminisce on the things we said
All the painted dreams running through our head
And we'll fall in love again On the first night
