

Fatalist

Front Line Assembly

It's in my head now
It's in my mind now
It's in my face now
It's in my brain now City of mutants
Darken then night
Evil illusion
Guided by light The friends you thought
They never were
Egos and icons
They just don't care You hope to die quiet
Laying in bed
It's better than pointing
A gun to your head
It's in my head now
It's in my mind now
It's in my face now
It's in my brain now City of mutants
Darken then night
Evil illusion
Guided by light City of mutants
Darken then night
Evil illusion
Guided by light All cold and forgotten
You only feel pain
This quest for hope
Is a losing gain
Another dream crumbles
In front of your eyes
Your paranoid vision
Only sees spies It's in my head now
It's in my mind now
It's in my face now
It's in my brain now City of mutants
Darken then night
Evil illusion
Guided by light City of mutants
Darken then night
Evil illusion
Guided by light
