

# In the Morning

[Michelle Williams](#)

"In The Morning" Alone in the dark  
Your world is breaking in parts  
Cause your heart is caving in  
Your lost in your cause  
That makes it even harder  
To find a will to live  
Now you know you're alone because it kills inside  
And you wish you could go numb  
and even your day dreams were a bad scene  
And you cry out wake me up But in the morning  
Wipe the sleep out of your eyes  
Cause in the morning  
You'll see that everything's just right  
It's all in your face  
I see you think that I'm crazy  
There's no way I could know  
But I only talk about what I know about  
I've been there before  
When you know you're alive because it kills inside  
And you wish you could go numb  
And even my day dreams were a bad scene  
Please God wake me up But in the morning  
Everything worked out alright  
Yeah in the morning you see that everything's just fine  
Cause I was as free as a bird and it felt so good  
I can't even it put in words  
It ain't too hard just believe until you know what it means to be free But in the morning  
Everything worked out alright  
Yeah in the morning you see that everything's just fine  
In the morning it'll be fine Cause I was as free as a bird and it felt so good  
I can't even it put in words  
It ain't too hard just believe until you know what it means to be free Cause in the morning  
Everything worked out alright  
Yeah in the morning you see that everything's just fine Cause in the morning I thank God that  
I'm alive  
Cause every morning is the start of all things right
