

Planets

Avenged Sevenfold

Godless
Meteoric war
Anger
Our existence nevermore You awoke the giants who were dormant in the sky
Comets raining death from a fiery eye
Mother of all
Your time is coming One with eternity
When planets collide
Planets collide
...
Damage
Galaxy destruct
Endless
Celestial a bit corrupt You will be forgotten like the others lost in time
Deaths symbolization left behind
Mother of all
Your time is coming One with eternity
When planets collide
Planets collide
...Take heed, the final march is closing in
You can't defeat them on your own
Weapons are longing for the final stand
And they're all aimed at you from heaven
Planets collide
Planets collide
Planets collide
Planets
Collide
(Solo)
You will be forgotten like the others lost in time
Deaths symbolization left behind
Mother of all
Your time is coming
One with eternity
When planets collide
Planets collide
(Solo)
