

# I Don't Care If You're Contagious

## Pierce the Veil

Bury me in the bedroom where I,  
I can sing you to sleep all night  
Put me next to the open window, promise me a second time 'Cause I don't wanna leave without  
you buried by my side  
I'd rather kill the one responsible for falling stars at night 'Cause they fall all around me  
The night can be deadly And they'll never take us alive  
(Can you chase away the darkness?)  
To live in love and die Last night, she recited every reason she's fine  
So if we're heading there together at the same time,  
You sing while I drive  
Move like a fugitive tonight  
(Dance on the ambulance)  
Because I would rather spend my life vacations in bed with you like drunken summer kites  
And this is only a test  
Sober and scaring me to death  
They'll never take us alive (Can you chase away the darkness?)  
To live in love and die And I don't care if you're sick  
I don't care if you're contagious  
I would kiss you even if you were dead  
Would somebody make me go blind for the rest of my life?  
'Cause I'd do anything to hold your hand And I don't care if you're sick  
I don't care if you're contagious  
Oh, no  
Would somebody make me go blind for the rest of my life?  
'Cause I'd do anything, anything, anything  
They'll never take us alive 'Cause I'll chase away the darkness  
I'll live in love and die  
I joined the party for the recently blind  
So if we're heading there together, you can sing all night I'm gonna tear out the thread one by  
one from your skin  
'Till your bones feel embarrassed from all the attention Kiss me while I drive
