

# Starman

## Sally Shapiro & Electric Youth

When?  
It happened so fast  
Those visions in my mind  
Although could it pass  
You're of a different kind  
It seems you come down from the stars  
And somehow you are still so much more human than they are. I want to know you,  
Mister Starman,  
I want to love you,  
Mister Starman.  
Love  
Can happen so fast  
And some say that it's blind  
The future is past  
You're from a different time  
Tell me, is it from there that you came?  
Our differences are vast  
But our hearts are still the same I want to know you,  
Mister Starman,  
I want to love you,  
Mister Starman,  
I want to know you,  
Mister Starman,  
I want to love you,  
Mister Starman.  
Don't go away,  
Alone.  
Don't go away,  
Alone. I want to know you,  
Mister Starman,  
I want to love you,  
Mister Starman,  
I want to know you,  
Mister Starman,  
I want to love you,  
Mister Starman.
