

# Hey

## Sammy Johnson

There's this girl I like to meet  
I hear people people on the streets, they talk about her all the time  
Say that she is all so fine  
Think I seen her once before, but I can't say this for sure  
Cause it was long ago  
So a night out with the boys  
I hear people making noise from the corner  
Where my eyes can't in my surprise  
Where's the girl that I've been dreamin of  
I just can't believe my love tonight. I said Hey (I said Hey)  
What's your name (What's your name)  
Did you come along  
Well I like to get to know you  
And baby I can show you a good time  
Now my friend are looking at me thinking,  
What is this guy up to  
Saying, I don't even stand that you's  
Shes been out wid dis only man  
I don't really care at all cause she'll be coming back for more after the night.  
As I make my way over to her  
I fee-ee-eel my stomach start to caving  
And I aint even there yet  
But someone might find the worst to say  
And now shes back to me  
And I have to say!
