Could've Been (feat. Bryson Tiller)

H.E.R.

Please, allow me to show you somethingSomebody give me YeahSomebody give me, uh

Somebody tell me the answers

Me and you isn't the answer, uh

Me and you isn't

Maybe I'm telling myself that

But there ain't nothin' that'll change that

What good would it be

If I knew how you felt about me? (yeah)It could've been right but I was wrong

Only think 'bout you when I'm alone

Part of me that cared just know it's gone

And I know, that I can't, get caught up

We could've been

And we tried to pretend

Every now and again

We don't dream about, don't think about what

We could've been

Though I'm holding again

'Cause I know in the end

You dream about, I think about what

We could've been

We could've been, yeah

We could've, damnRemember?

Remember the night in Miami

First time you put your arms around me

I'm up reminiscing (ooh yeah)

Thinking about you isn't helping

Thinking about you doesn't tell me

What good it would do, if I decide to face the truth

It could've been right but I was wrong

Only think 'bout you when I'm alone

You only hit me up when she's not home

And that's why, I can't, get caught upWe could've been

And we tried to pretend

Every now and again

We don't dream about, don't think about what

We could've been

Though I'm holding again

'Cause I know in the end

You dream about. I think about what

We could've been

We could've been

We could've We could've been

What we could've been, we could've beenAy

What we could've been What we should've been

If I wasn't, if I wasn't-With somebody, if you gotta hide it what's the point of trying?

I ain't just your friend, no, what's the point of lying?

Tryna sell a story ain't nobody buyin' Look me in my eyes, don't that feel nice?

> Why should it end? Baby I could've been

I could've been him, more than your friend

Just say where and when, where to make a trip

Baby make a wish, be the one I'm with

Should've been a-, should've, could've, would have been, ay

Yeah I would have been (damn)

Yeah I would have been (yeah)Damn, damn (could've been)

Yeah, we could've been (oh no)
