

Movie Screens

Meese

what you heard was
coming from the lips of devils
spelling out the words on black boards
for everyone to see
for everyone to see
my subconscious
is working off the clock again
he's blacking out the worst of it
filtering the rest
filtering the...
do we think the walls are closer than they seem
and i am close to you and i lost everything
and she said to be careful, i am careful, i see
ghost folling me, watching my memories on movie screens
and ghost calling my name, from places we used to live when we were kids
and ghost following me, watching my memories on movie screens
and ghost calling my name, from places we used to live when we were kids
back home
what you saw was
an angel that was cast from shadows
streching on for miles and miles
for everyone to see
for everyone to
you clear the hurdle,
theres another in its place
we fall to pieces for another pretty face
and she said to be careful, i am careful, i see
ghost following me, watching my memories on movie screens
and ghost calling my name, from places we used to live when we were kids
and ghost following me, watching my memories on movie screens
and ghost calling my name, from places we used to live when we were kids
back home
