

Only Want You

Brett Dennen

Listen to the river
Does it make you wonder
How anything could ever stand still? First lightning then thunder, thunder.
A kiss in the rain, love
Feel the thrill. () I only want you
I only want you
I want what we had. I only want you
I only want you
It's as simple as that. Run to the forest
You'll find some shelter.
Remember how we fell in love so sweet? You said watch your step
Walk softer softer
'Cause dreams are growing beneath our feet. () I only want you
I only want you
I want what we had. I only want you
I only want you
Can we get it back? I only want you
I only want you
I want what we had. I only want you
I only want you
It's as simple as that.
Yours is the best love,
It's the best love.
So pure and so true. Our love will lift us
Our love will lift us.
Only love, my darlin'.
Only you. When I do not feel inspired
I can only speak my heart. I'm sitting in the middle of a fire, fire
And I can't even catch a spark. () I only want you
I only want you
I want what we had. I only want you
I only want you
Can we get it back? I only want you
I only want you
I want what we had. I only want you
I only want you
It's as simple as that.
