

# Slave

## Ces Cru

Yeah

Oh gosh - oh gosh - oh gosh  
Lookit I know and understand what happen to costs  
People, they be so in the dark about the natural laws  
And I guess the focal point's attacking the cause  
And understand that nothing blue under the sun at all  
Why even act if you're only acting accordingly  
And wouldn't dare to challenge the power of that authority  
Not everybody but I'ma say the majority  
Are under mind control and won't never notice cuz morally  
They numb enough to take you out just the same  
You can master the non-aggression once you balance your brain  
If you agree to play the game you have no right to complain  
Love is the law to all of ya'll and I'm just doing my thang!  
Why even picket cause you failed to engage  
When you don't even realize the got your head in a cage  
The rats race and headed straight to the maze  
And you don't get the message even though the stress it on stage  
Ain't nothing ill nothing you say real words  
Get re-acquainted with the brakes cuz it may build nerves  
And a slave will serve  
And a slave will serve  
And a slave will serve  
And a slave will serve  
And a slave, and a slave, and a slave  
And a slave, and a slave, and a slave...  
Really hurts me to say  
It taught you how to behave  
You've got one foot in the grave  
You've gotta know you're a slave  
You're a - You're a - a  
Now think about if everything was to flip up  
You taxin' everybody they dont know it's a stick up  
The politicians prolly just forgetting they tip sucked  
Whoever makes the cut is next in line for the nip-tuck  
The freedom fighters crumbling when it gets rough  
Retreating is a form of weakness we can see shit stuck  
Its sick to think about how much the frequency missed us  
Manipulated media keeps leaving us mixed up (fuck)  
And now its time i harness all of my skill  
And exercise the right to act when love is under my will  
Internalize the vigilance and never stop it until

The crooked people put in power know this isn't a drill  
For real Why even picket it 'cause you fail to engage  
When you don't even realize the got your head in a cage  
The rats race and headed straight to the maze  
And you don't get the message even though the stress it on stage  
Ain't nothing ill nothing you say real words  
Get re-acquainted with the brakes cuz it may build nerves  
And a slave will serve  
And a slave will serve  
And a slave will serve  
And a slave will serve  
And a slave, and a slave, and a slave  
And a slave, and a slave, and a slave...  
Really hurts me to say  
It taught you how to behave  
You've got one foot in the grave  
You've gotta know you're a slave  
You're a - You're a - a
