## Fantasia

## **Stratovarius**

Welcome to my world Close the gates You've come from far away I've been expecting you You are the holders of the key To the story that never endsFantasia Resides deep in your heart Leave your worries far behind Fantasia Let the freedom ring the bell Let us all unite Borders made of hate are gone Nations singing the song of peace In Fantasia How would it be? A world without hate Without heaven, without hell No wars, no arms, no religion, no God Just your own truth(Fantasia can arise in you)Fear and darkness prevail But finally they will failFantasia Resides deep in your heart Leave your worries far behind Fantasia Let the freedom ring the bell Let us all unite Borders made of hate are gone Nations singing the song of peace Fantasia Fantasia One day when love conquers all Mankind will prevail No more jealousy Fantasia No more envy no deceit The nothing is gone Future's bright and glorious We are all victorous We are kings in Fantasia
