

# Village

## Cam

Claire, don't you dare believe them  
I'd never leave you alone  
I've been watching over you like older brothers do  
Since the day you were born I know it feels like I have let you down  
But I'm still around Cause your whole heart's a village  
Everyone you love has built it  
And I've been working there myself  
And that's where I'll be  
With a front-row seat  
To watch you live your life well Streets lined with cottages and cabins  
The skies are always blue  
I spend my days with ghosts who all love you the most  
But no one quite like I do  
There'll be days you need me by your side  
And that's alright Cause your whole heart's a village  
Everyone you love has built it  
And I've been working there myself  
And that's where I'll be  
With a front-row seat  
To watch you live your life well I know the world outside seems different  
But one thing will never change  
I know who've you been and who you'll become  
And my Heaven is here with you always Cause your whole heart's a village  
Everyone you love has built it  
And I've been working there myself  
And that's where I'll be  
With a front-row seat  
To watch you live your life well  
Your whole heart's a village  
Everyone you love has built it  
And I've been working there myself  
And that's where I'll be  
With a front-row seat  
To watch you live your life well  
And I know you'll live your life well
