

Watching Over You

Glenn Medeiros

Now that you're far away
I can see everything so clear
Now that you're really gone I can feel you like you're standing here
And if I had another chance
to say goodbye
I would just say thank you for the times we spent
And not to cry, 'cause I'm still watching over you
Though we're far apart
You'll never really be
So far from my heart
I'm watching over you
I've looked inside my dreams
And everything I see
You watching over me
How can we lose our way
If we just let ourselves be led
And maybe it hurts today
But tomorrow we'll come out ahead
I don't want to lose you so I'll let you go
And if it ends up we are meant to meet again
We'll let each other know
'Cause I'm... still watching over you
Though we're far apart
You'll never really be
So far from my heart
I'm watching over you
I've looked inside my dreams
And everything I see
You watching over me
Instrumental break
I don't want to lose you so I'll let you go
And if it ends up we are meant to meet again
We'll let each other know
I'm watching over you
Though we're far apart
You'll never be
So far from my heart
I'm watching over you
I've looked inside my dreams
And everything I see
You watching over me
