Blind

Placebo

If I could tear you from the ceiling And guarantee a source divine Rid you of possessions fleeting Remain your funny valentineDon't go and leave me And please don't drive me blind Don't go and leave me And please don't drive me blindIf I could tear you from the ceiling I know best have tried I'd fill your every breath with meaning And find a place we both could hide Don't go and leave me And please don't drive me blind Don't go and leave me And please don't drive me blindYou don't believe me But you do this every time Please don't drive me blind Please don't drive me blindI know you're broken I know you're broken I know you're brokenIf I could tear you from the ceiling I'd freeze us both in time And find a brand new way of seeing Your eyes forever glued to mine Don't go and leave me And please don't drive me blind Don't go and leave me And please don't drive me blind Please don't drive me blind
