

With You

Tyler Shaw

Running late on a Wednesday
Shortcut by the freeway
Locked eyes as you passed me
Two hearts on a cold street
Looking back at the same time
I feel your warmth, did you feel mine?
I get the urge, but I can't speak
Two hearts on a cold street I know this sounds crazy
But this could be fate
And I'm thinking maybe
That you feel it too
Tell me are you busy?
And tell me you can stay
'Cause I'm thinking maybe
For you, I would travel to outer space
Take a bullet to the heart just to keep you safe
For you, anything for you
With you, all the years just fade away
Like a dream in my arms, but I'm wide awake
With you, whenever I'm with you Ain't it funny how the time flies?
Now you're here as my wife
Remember how you met me?
Two hearts on a cold street?
Three kids, and a big house
Can't believe we're here now
Your warmth has never left me
Two hearts on a cold street
And now it's not crazy
I told you it's fate
Remember that day as
I lay here with you
So happy you weren't busy
I'm glad that you stayed
I still feel the same, yeah For you, I would travel to outer space
Take a bullet to the heart just to keep you safe
For you, anything for you
With you, all the years just fade away
Like a dream in my arms, but I'm wide awake
With you, whenever I'm with you Two hearts on a cold street
Two hearts on a cold street
Two hearts on a cold street
Two hearts, just you and me

Now it's just you and me
For you, I would travel to outer space
With you, all the years just fade away
For you, I would travel to outer space
Take a bullet to the heart just to keep you safe
For you, anything for you
With you, all the years just fade away
Like a dream in my arms, but I'm wide awake
With you, whenever I'm with you
With you, with you, with you
With you, with you, with you
With you, with you, with you
